X-Ray & Accompanied Minor Policy

Ortho 360 utilizes two different types of x-ray/radiograph images to assist in the diagnosis and recommended treatment of patients. These include the panoramic and cephalometric orthodontic extraoral x-ray images. Since only about one-third of the actual tooth is visible in the mouth, radiographs provide valuable information doctors cannot otherwise see. Radiographs provide the only way to view the bone, roots, attachments and interproximal areas as well as under and around restorations. Radiographs also provide a starting point for what current conditions a patient has at the start of treatment and what changes may occur by the patients next appointment. Detection of harmful conditions as well as the overall progress being made during treatment are often impossible without radiographs.

I understand that x-rays/radiographs are necessary to provide appropriate diagnosis and treatment for my child. _____ (Initial)

By law, any child under the age of 18 may not be seen by a doctor without the consent of their parent or legal guardian. If the minor arrives in the office with someone other than their parent or guardian, we must have written permission from their parent/guardian that this person has been appointed by you to act on your behalf. You may appoint any person(s) over the age of 18 to accompany your child to their appointments with the signed consent form you will have provided to us. This will include the appointed person(s) name, address, and phone number. Please request this from from our office staff if at any point you would like to appoint someone to help your child arrive to their appointments.
